U. S. Patent and Trademark Office PTO-326 (Rev. 9-97)

Part of Paper No.

Application/Control Number: 09/445,844

Art Unit: 1714

## **DETAILED ACTION**

Applicants are required to amend the specification at page 1, line 1 after the title of the instant application to incorporate the continuity data.

This application does not contain an abstract of the disclosure as required by 37 CAR 1.72(b). An abstract on a separate sheet is required.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 12 (and its dependent claims) is indefinite for cross linked polymer and thermoplastic matrix. Claims 2 (and its dependent claims) and 11 are indefinite for impact modifier. Claims 6 is indefinite for cross linker. Claims 6, 8, 9, 10, 16, 17, 18, 19 are multiple dependent claims and are indefinite. In the interest of compact prosecution the improper multiple dependent claims are being treated on the merits as being dependent on the independent claims.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 09/445,844

Art Unit: 1714

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CAR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Minghetti et al 5,242,968, Ghahary 5,304,592 and Cozens et al 5,130,374.

Minghetti, note in the entirety; Ghahary, note column 1, lines 24-43, column 2, lines 20-50, column 3, lines 30-59 and column 4, lines 1-65; and Cozens et al, note column 2, lines 32-45, column 3, lines 63-68, and column 4, lines 1-65, teach and disclose acrylic thermoformable acrylic sheets, granite textured plastics and rigid thermoplastic compositions, process for producing the same which render the claimed composite plastics compositions, composite produced by process for forming the same, extruded sheets and thermoformed product obvious. The prior art teach and disclose various cross linked polymers and thermoplastic matrix within applicants claimed ranges which render the claimed invention obvious.

The prior art cited but not applied further teaches composite plastics of the same nature as claimed by Applicants.
